# EPUK Plot Upscaler - Quick Start Guide

## Step 1: Extract the App

Right-click on the downloaded 'EPUK_Upscaler_App.zip' file and select 'Extract All...'. Choose a folder you'll remember, like your Desktop or Documents.

## Step 2: Open PowerShell in the Folder

1. Go into the folder you just extracted.

2. Hold the Shift key and right-click inside the folder (not on a file).

3. Click 'Open PowerShell window here'.

## Step 3: Install the App Requirements

In the PowerShell window that opens, type the following and press Enter:

```
pip install streamlit pandas numpy
```

Wait until it says 'Successfully installed...' before continuing.

## Step 4: Run the App

Type the following command and press Enter:

```
streamlit run epuk_upscaler_app.py
```

This will open the app in your web browser.

## Step 5: Use the App

1. Upload your .EPUK file

# EPUK Plot Upscaler - Quick Start Guide

2. Set the original and desired plot size

3. Download the adjusted .EPUK file

You're good to go!

## Need Help?

If something doesn't work, make sure you're in the right folder where epuk_upscaler_app.py is located. You can also ask your team lead or contact support.
